EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

• In Specification, p. 5, line 2; "provide to" has been changed to --to provide--.

REASONS FOR ALLOWANCE

- 2. The following is an examiner's statement of reasons for allowance:
 - It is well known in the art that a large amount of magnetoresistance effect films have structure, which includes: a seed layer; a first pinned magnetic layer being formed on the seed layer; an antiferromagnetically coupling layer being formed on the first pinned magnetic layer; a second pinned magnetic layer being formed on the antiferromagnetically coupling layer; a nonmagnetic layer being formed on the second pinned magnetic layer; a free magnetic layer being formed on the nonmagnetic layer; and a protection layer being formed on the free magnetic layer. However, none of prior art on record further shows that the seed layer acts as a pinning layer, which fixes magnetizing directions of the first pinned magnetic layer and the second pinned magnetic layer, and the seed layer is made of a material which does not exchange-couple with the first pinned magnetic layer.
 - Applicant declares that the present invention is to provide a magnetoresistance
 effect film capable of performing enough function without employing an
 antiferromagnetic layer; thus having a narrow core width to realize high
 resolution (Specification, p.5).

Conclusion

3. The prior art made of record in PTO-892 Form is considered pertinent to

applicant's disclosure.

Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."
